SUMMER INTERNS SUPERVISED:

Jure Leskovec, 2005, Ph.D. student in Computer Science from CMU. Jure analyzed the statistical properties of a large scale recommendation network.

Joshua O'Madadhain, 2004, Ph.D. student in Computer Science from UC Irvine. His project included applying link prediction to email networks as well as using predictive metrics to filter inaccurate social network data.

RESEARCH EXPERIENCE:

HP Labs, 2001-2005 Research Staff Member
Worked on various research projects relating to networks constructed from large data sets. These projects included mining the medical literature for gene-disease connections, tracking and modeling information flow in email and blog networks, modeling search processes on real-world social networks, and building expertise-finding systems for HP's internal use.

Stanford University/ Xerox PARC, 1997 — 2001 Graduate Research Assistant
I had the opportunity to work on my PhD at Stanford while collaborating with researchers at Xerox PARC, since my advisor, Prof. Bernardo A. Huberman was affiliated with both. I modeled growth and search processes of the internet.

Caltech, 1996-1997 Undergraduate Research Assistant
Worked under the supervision of Prof. Harry A. Atwater on materials deposition with pulsed laser ablation.

Caltech, 1994-1995 Undergraduate Research Assistant
Worked under the supervision of Prof. Donald Burnett and Dr. Roger Wiens on designing an electrostatic solar wind concentrator for the Genesis mission.
